B.Tech	NIT, Jalandhar	2005-09	7.61

EXPERIENCE

Accenture

September 2009 – Present

Senior Software Engineer (Analyst Programmer)

<http://www.accenture.com>

Accenture is a global management consulting, technology services and outsourcing company helping clients become high-performance businesses and governments. I work as a Java and Web developer, formerly having had my primary skill as .NET (C# and ASP.NET).

CIO Beta Innovation (November 2009 – Present)

In my present job, I'm mostly involved in research and development for internal applications. I'm responsible for independently owning applications & assignments and their related development processes, from planning to designing to coding to supporting after release. As the senior developer in my team and subject matter expert in several key and new technologies, my work also revolves around constantly overseeing the work of and helping the rest of the team in their respective assignments.

I usually develop on various bleeding edge technologies and platforms, and have done assignments in .NET, Android SDK, iPhone, jQuery (+UI), meteor.js, MS Exchange Web Service, WCF, Facebook, OAuth-based web apps, Add-In Express (MS Office addins), and more. My work usually requires me to develop web apps (Web 2.0, ASP.NET, PHP) and sometimes desktop tools (C#, Java). I am also involved in the sole development and support of three high volume & popular internal web apps.

Skills

Java
C#
C/C++
ASP.NET
JavaScript
Python
PHP
HTML/XHTML
CSS
Bash Shell Scripting
XML
jQuery

Visual Studio
Eclipse
GIMP

Certifications

Microsoft Certified
Technology Specialist

Microsoft Certified
Professional

ASDA Certified
Application Developer

Oracle Certified Java
SE Programmer

PROJECTS

Granular Linux Project

December 2006 – Present

Founder and Team Lead

<http://www.granularproject.org/>

Granular is a **Linux**-based operating system, also called a **distribution**. It is based on PCLinuxOS and aimed at providing an easy-to-use, stable, and functional Linux experience to the end users. It has a global user base and a good reputation among other Linux distributions.

Computer Science Department Website

June 2008 – July 2008

For NIT, Jalandhar

<http://nitj.ac.in/cse/>

This website was developed as part of my industrial training. The website features good overall design, robust security checks, full-featured and easy-to-use content management, and news management system.

Survey Web App

December 2008 – January 2009

For Accenture

A feature-rich survey creation tool. Built using the latest web technologies – PHP, AJAX and MySQL – it was designed as a Web 2.0 website. The project was done under the supervision of **Mr. Kenneth Corless**, Executive Director, Business Applications, Accenture.

ShareNet

March 2009 – May 2009

For NIT, Jalandhar

A Java-based LAN P2P file sharing application that follows a client-server model using centralized peer-to-peer approach for file sharing. Done as the major project during final semester in B.Tech.

Other Projects

<http://www.anuragbhandari.com/showcase/>

Stuff I did in my free time or as small projects or just to test my capabilities:

- ✓ **UnJumble** – A small, simple, neat and fast Android app that unscrambles jumbled English words.
- ✓ **MyBlog** – a web blog engine/platform
- ✓ **Granular Package Archive** – backend and interface for easy browsing of package repository
- ✓ **Community Forum** – a simple and fast forum software
- ✓ **Jumbled Words Game** – a graphical game done in Python
- ✓ **Albums Database** – jQuery-based AJAX application to submit and search music albums

HOBBIES & INTERESTS

- **Hobbies:** Reading, Blogging, Gaming, Movies, Sports, Music, Philately, Internet Surfing.
- **Interests:** Web/Software Development, Operating Systems, Troubleshooting, Databases.

ACTIVITIES & AWARDS

- Participation in various events throughout school and college life – general, technical and business quizzes, debates, presentations, seminars
- Class Representative for four consecutive years at school
- Student Team Lead, NASA Space Settlement Design Contest, 2004-05
- Runner-up, Network Competition event, TechNiti, NITJ, 2007
- Winner, Business Quiz, Utkansh, NITJ, 2009
- Regional Finalist, Tycoons, Career Launcher, 2009
- First Prize, Book Review Contest, Accenture, 2010
- Successfully cleared “ASDA Certified Application Developer” certification (jointly issued by Accenture and MIT), 2011
- Star of the Month—twice, Star Team of the Month—once, Accenture
- Winner, Story Writing Contest, Accenture, 2012

RECOMMENDATIONS

“

Anurag and I have worked together for the past year on various projects in Accenture's Beta/Innovation group. We work in very fast paced, very creative environments where "requirements" may come in the form of a two sentence "idea" and we then move that idea to an application. I have enjoyed working with Anurag immensely, he is bright, creative and willing to change and adapt and learn new things. I highly recommend Anurag.

Chip Allen, *Senior Manager, Accenture*

chip.c.allen@accenture.com

“

Anurag is an excellent Team Leader, Programmer and a Web Developer. He was one of few persons who gave me an excellent experience of working in a team. To be true is more like my brother rather than team leader to me. Keep it up Anurag!

Anurag Bhatia, *Chief Web Infrastructure Advisor, Granular Project*

me@anuragbhatia.com

“

I'm seeing a future entrepreneur in him, though in studies, people generally do with academics, but this exquisite mind had achieved a lot in the matter of time pragmatically, when we were just seeing the horizons of Technologies or learning Jargon during our technological studies era. He amazed everybody with his routine projects (capable of future turning ventures), branding of own Linux is just an example to showcase his adroitness in tech-savvy world. I know this disciplined and sagacious personality has to achieve a lot and it's obvious to say that we aren't expecting unexpected things because I'll already termed him future entrepreneur. So, good luck!

Bikramjit Singh, *Research Assistant, Aalto University School of Science and Technology*
